

Config. program ■ V1.02
Firmware for BDI3000 ■ V1.23

Date: July 9, 2009

Enhancements

- New reset mode ONCE added (see manual)
- Support for Spansion flash S29WS-R added (new algorithm).
- Support for Atmel AT91SAM9XE internal flash added.
- Improved Telnet MT command (simple memory test).

Config. program ■ V1.03
Firmware for BDI3000 ■ V1.24

Date: August 17, 2011

Enhancements

- Download speed via GDB improved.
- Maximal number of software breakpoints increased to 64.
- The BDI no longer automatically steps over a GDB set breakpoint at the current PC.
This allows to use the GDB „jump“ command.
